

GIGACORE

Release notes.

Version 1.7.2

Applicable models:

GigaCore 30i / GigaCore 20t / GigaCore 18t / GigaCore 16t / GigaCore 16tf / GigaCore 16i /
GigaCore 10t / GigaCore 10i / GigaCore 10t-IP

Release notes GigaCore 1.7.2

With this release, Luminex introduces improvements and bug fixes.

Applicable Models:

GigaCore 30i / 20t / 18t / 16t / 16tf / 16i / 10t / 10i / 10t-IP

Improvements:

We've improved how GigaCore handles very large bursts of ARP requests in the network. This improvement minimizes the risk of CPU-load related IGMP issues.

Bug fixes:

A bug has been resolved where an offline project could not be deployed from Araneo when a password had been configured in the offline configuration.
