

LUMINODE / LUMICORE

Release notes.

Version 2.9.1

Related products: LumiNode range, LumiCore range.

With this release, we introduce bug fixes,
no new features have been implemented.

Related products:

- LumiNode range
- LumiCore range

Bug fixes:

- Fixed an issue on the LCD & jog button interface where changing process engine parameters resulted in incorrect configurations.
- A bug has been resolved where packets coming in on a port with a VLAN ID tagged for a known group, would go out on the group with that VLAN ID.
- An issue has been resolved where in rare occasions, the device failed to fully boot up due to a race-condition.
