NEW. **FEATURES**

■ **Lamp library**

Migrated the Lamp Library to the AppData folder to allow easier updates without requiring administrator privileges.

■ **ArtNet4 compliance**

Luminet Monitor is now compliant with the ArtNet 4 standard.

■ **Lumisplit support**

Added support for LumiSplit V6.

■ **LumiNode update**

Allow updating a LumiNode using Luminet Monitor.

■ **LumiCore support**

Added support for the LumiCore product.

■ **Removed ZLib dependency**

Removed unused ZLib dependency on MacOS and Linux.

■ **Implement the RDM "Set DMX Fail mode" message**

Implemented the RDM specification of the "Set DMX Fail mode" message to specify which behaviour should be applied when the DMX input fails.

LumiNet
MONITOR

■ **Set DMX fail mode from context menu**

Allow changing the DMX fail mode and startup mode from the
context menu. Additionally, a snapshot can be captured which
can subsequently used for the DMX fail and startup modes.

BUG / **FIXES**

■ **Fixed translation support**
