What's new in Offline Editor 1.1.3?

The new Offline Editor v1.1.3 comes with some new functionalities, such as:

1. Software update notification

This Offline Editor 1.1.3 version will now show notification when a new software version is available.

2. Frozen top row

When using a device fitted with lots of ports such as the GigaCore 26i, the top row is now frozen for a better visualization of the parameters' names.

Port	Legend	Group	Speed	RLinkX	RMON	PoE	PoE Priority
9	Port 9	Management	Auto	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Low
10	Port 10	Management	Auto	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Low
11	Port 11	Management	Auto	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Low
12	Port 12	Management	Auto	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Low
13	Port 13	Management	Auto	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Low

3. Improved visualization of a row

When the user hover its mouse over a row, he can now better see the row its pointer is aligned with.

12	Port 12	Management	Auto	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Low
13	Port 13	Management	Auto	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Low
14	Port 14	Management	Auto	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Low
15	Port 15	Management	Auto	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Low
16	Port 16	Management	Auto	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Low
17	Port 17	Management	Auto	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Low

4. GigaCore Switches

AVB

Offline Editor version 1.1.3 now offers AVB settings in the profile creation process. Version 2.8.x needs to be selected to access this AVB setting.

The GigaCore switch needs to run at least firmware 2.7.x to be compliant with a profile using AVB settings.

However, you won't be able to send any SET messages to these RDM devices. This means you won't be allowed to configure these devices if they are not attached to a Luminex Ethernet-DMX converter.

Tagged Management Group

Offline Editor 1.1.3 now fully supports the new functionalities of the v2.7.x firmware for the GigaCore series, including the Tagged Management group.

5. Ethernet-DMX firmware v4.3.x compliance

Offline Editor 1.1.3 now fully supports the new functionalities of the v4.3.x firmware for the Ethernet-DMX series, including the snapshot selection.

6. Bug fixes

The following bug fixes have been applied to Offline Editor 1.1.3:

- Application's interface cosmetic issues
- Converter: Unicast address of a rerouted universes is not stored
